

INDEX TO VOLUME XXXV

- Adjaero, Isabelle and Spiegel, Eugene *On the uniqueness of the coefficient ring in a group ring*, 654-673
- Ahern, Patrick *The Poisson integral of a singular measure*, 735-749
- Babiker, A. G. A. G. and Graf, S. *Homomorphism-compact spaces*, 558-576
- Barnes, E. S. and Sloane, N. J. A. *New lattice packings of spheres*, 117-130
- Baxter, J. R. and Olsen, J. H. *Weighted and subsequential erodic theorems*, 145-166
- Beesack, Paul R. *On inequalities complementary to Jensen's*, 324-338
- Bell, Murray *Two Boolean algebras with extreme cellular and compactness properties*, 824-838
- Bergen, Jeffrey, Herstein, I. N. and Lanski, Charles *Derivations with invertible values*, 300-310
- Bisztriczky, Tibor *C-nodal surfaces of order three*, 68-100
- Borwein, Peter B. *Uniform approximation by polynomials with variable exponents*, 547-557
- Bray, Una and Whaples, George *Polynomials with coefficients from a division ring*, 509-515
- Brown, T. C. and Buhler, J. P. *Behrend's theorem for dense subsets of finite vector spaces*, 724-734
- Browne, Patrick J. and Nilsen, R. V. *On difference operators and their factorization*, 873-897
- Buhler, J. P. and Brown, T. C. *Behrend's theorem for dense subsets of finite vector spaces*, 724-734
- Cenzer, Douglas and Mauldin, R. Daniel *Representations of well-founded preference orders*, 496-508
- Chattopadhyay, K. C., Njastad, Olav and Thron, W. J. *Merotopic spaces and extensions of closure spaces*, 613-629
- Chaudhry, Muhammad Aslam and Pandey, J. N. *The Hilbert transform of generalized functions and applications*, 478-495
- Dangelo, F. and Lindahl, R. *Semidirect product compactifications*, 1-32
- Daniels, Peg *Normal, locally compact, boundedly metacompact spaces are paracompact: An application of Pixley-Roy spaces*, 807-823
- de Pagter, Ben and Huijsmans, Charles B. *Maximal d-ideals in a Riesz space*, 1010-1029
- Edelson, Allan L. and Perri, Emilia *Asymptotic behaviour of nonoscillatory equations*, 436-453
- Edwards, Robert and Gillman, David *Any spine of the cube is 2-collapsible*, 43-48
- Enns, T. C. *The radii of polyhedrons*, 33-42
- Fantham, P. H. H. and Moore, E. J. *Groupoid enriched categories and homotopy theory*, 385-416
- Fong, C.-K. and Holbrook, J. A. R. *Unitarily invariant operator norms*, 274-299
- Fresnel, Jean and Matignon, Michel *Produit tensoriel topologique de corps values*, 218-273
- Friedman, Nathaniel A. *Mixing on sequences*, 339-352
- Gessel, Ira M. *Some congruences for generalized Euler numbers*, 687-709

- Gillman, David and Edwards, Robert *Any spine of the cube is 2-collapsible*, 43-48
- Gluck, David *Trivial set-stabilizers in finite permutation groups*, 59-67
- Graf, S. and Babiker, A. G. A. G. *Homomorphism-compact spaces*, 558-576
- Harache-Olsen, Harald *On the structure of tensor products of JC-algebras*, 1059-1074
- Herstein, I. N., Bergen, Jeffrey and Lanski, Charles *Derivations with invertible values*, 300-310
- Herz, Carl *Alternating 3-forms and exceptional simple Lie groups of type G_2* , 776-806
- Hoffman, P. *Hopf algebras from branching rules*, 177-192
- Holbrook, J. A. R. and Fong, C.-K. *Unitarily invariant operator norms*, 274-299
- Huijsmans, Charles B. and de Pagter, Ben *Maximal d -ideals in a Riesz space*, 1010-1029
- Hurvitz, Sara *P -isolated maps and localizations*, 193-217
- Jhastad, Olav, Chattopadhyay, K. C. and Thron, W. J. *Merotopic spaces and extensions of closure spaces*, 613-629
- Kan, Charn-Huen *Ergodic properties of Lamperti operators, II*, 577-588
- Kandil, A. *A large inductive dimension of proximity spaces*, 961-973
- Kannappan, P. L. and Ng, C. T. *On a generalized fundamental equation of information*, 862-872
- Kirschenbaum, Marc and Lu, Yung-Chen *Sufficiency of Weierstrass jets*, 167-176
- Koblitz, Neal *p -adic eigen-functions for Kubert distributions*, 674-686
- Lanski, Charles, Bergen, Jeffrey and Herstein, I. N. *Derivations with invertible values*, 300-310
- Lebow, A. and Schreiber, M. *Scalar actions*, 750-768
- Leeming, D. J. and MacLeod, R. A. *Generalized Euler number sequences: Asymptotic estimates and congruences*, 526-546
- Lindahl, R. and Dangello, F. *Semidirect product compactifications*, 1-32
- Liskovets, V. A. and Walsh, T. R. S. *The enumeration of non-isomorphic 2-connected planar maps*, 417-435
- Lu, Yung-Chen and Kirschenbaum, Marc *Sufficiency of Weierstrass jets*, 167-176
- McNulty, George F., Nordahl, T. and Scheiblich, H. E. *Injectives and projectives in term finite varieties of algebras*, 769-775
- MacLeod, R. A. and Leeming, D. J. *Generalized Euler number sequences: Asymptotic estimates and congruences*, 526-546
- Matignon, Michel and Fresnel, Jean *Produit tensoriel topologique de corps values*, 218-273
- Matsumoto, Yokio and Yamada, Akio *On the resolution diagrams of the Brieskorn singularities $(2, q, r)$ of type II*, 1049-1058
- Mauldin, R. Daniel and Cenzer, Douglas *Representations of well-founded preference orders*, 496-508
- Miers, C. Robert and Phillips, John *Algebraic inner derivations on operator algebras*, 710-723
- Monson, Barry *Simplicial quadratic forms*, 101-116
- Moody, R. V. and Pianzola, A. *λ -mappings between representation rings of Lie algebras*, 898-960
- Moore, E. J. and Fantham, P. H. H. *Groupoid enriched categories and homotopy theory*, 385-416

- Moore, R. L. and Weiss, G. *The metric Fuglede property and normality*, 516-525
- Morris, Lawrence *Some remarks on Eisenstein series for metaplectic coverings*, 974-985
- Ng, C. T. and Kannappan, P. L. *On a generalized fundamental equation of information*, 862-872
- Nilsen, R. V. and Browne, Patrick J. *On difference operators and their factorization*, 873-897
- Nordahl, T., McNulty, George F. and Scheiblich, H. E. *Injectives and projectives in term finite varieties of algebras*, 769-775
- Noussair, Ezzat S. and Swanson, Charles A. *Global positive solutions of semilinear elliptic equations*, 839-861
- O'Brien, G. L. *Obtaining prescribed rates of convergence for the ergodic theorem*, 1129-1146
- Olsen, J. H. and Baxter, J. R. *Weighted and subsequential erodic theorems*, 145-166
- Pandey, J. N. and Chaudhry, Muhammad Aslam *The Hilbert transform of generalized functions and applications*, 478-495
- Paterson, Alan L. T. *Amenability and translation experiments*, 49-58
- Pavlos, Panaiotis K. *On integration in partially ordered groups*, 353-372
- Perri, Emilia and Edelson, Allan L. *Asymptotic behaviour of nonoscillatory equations*, 436-453
- Phillips, John and Miers, C. Robert *Algebraic inner derivations on operator algebras*, 710-723
- Pianzola, A. and Moody, R. V. λ -mappings between representation rings of Lie algebras, 898-960
- Scheiblich, H. E., Nordahl, T. and McNulty, George F. *Injectives and projectives in term finite varieties of algebras*, 769-775
- Schreiber, M. and Lebow, A. *Scalar actions*, 750-768
- Schwartz, Niels *Local stability and saturation in spaces of orderings*, 454-477
- Shahidi, Freydoon *Some results on L-indistinguishability for $SL(r)$* , 1075-1109
- Sherling, Dorothy D. *Concerning the cone-hyperspace property*, 1030-1048
- Sloane, N. J. A. and Barnes, E. S. *New lattice packings of spheres*, 117-130
- Smith, P. F. *Rings with enough invertible ideals*, 131-144
- Spiegel, Eugene and Adjaero, Isabelle *On the uniqueness of the coefficient ring in a group ring*, 654-673
- Strelitz, Sh. *Three theorems on the growth of entire transcendental solutions of algebraic differential equations*, 1110-1128
- Swanson, Charles A. and Noussair, Ezzat S. *Global positive solutions of semilinear elliptic equations*, 839-861
- Takahasi, Sin-ei *Central double centralizers on quasi-central Banach algebras with bounded approximate identity*, 373-384
- Terada, Toshiji *Dense subspaces of product spaces*, 986-1000
- Thron, W. J., Njastad, Olav and Chattopadhyay, K. C. *Merotopic spaces and extensions of closure spaces*, 613-629
- Ucci, Jack *On $BP<1>^*(K(Z, 3); Z/p)$* , 630-653
- Van, Quach Thi Cam *On a realization of prime tangles and knots*, 311-323
- Von Zur Gathen, Joachim *Secant spaces to curves*, 589-612
- Walsh, T. R. S. and Liskovets, V. A. *The enumeration of non-isomorphic 2-connected planar maps*, 417-435

Warren, Richard H. *Spaces with a unique uniformity*, 1001-1009

Weiss, G. and Moore, R. L. *The metric Fuglede property and normality*, 516-525

Whaples, George and Bray, Una *Polynomials with coefficients from a division ring*, 509-515

Yamada, Akio and Matsumoto, Yokio *On the resolution diagrams of the Brieskorn singularities*
(2, q , r) of type II, 1049-1058
